"The best way to predict the future is to invent it. - Alan Kay"

Summary

As a Senior Software Developer at WTFast, I apply my Go knowledge and software architectural design skills to create high-performance web and cloud solutions for online gamers. I have over four years of experience in this role, and I enjoy working with a passionate and innovative team that strives to improve the gaming experience for thousands of users worldwide.

Before joining WTFast, I was a Software Architect at Atomic47 Labs, where I worked in the blockchain industry. Through these experiences, I developed strong competencies in software development, continuous integration, and web and cloud technologies.

I have many years of experience designing, building, refactoring, and enhancing software applications. I enjoy refactoring legacy code bases so they can bring the most business value.

Work Experience

AAA Internet Publishing Inc. (DBA WTFast)

Kelowna, BC. Canada
