Mobile	.NET MAUI (Android + iOS), React Native
Build	Github Actions, Jenkins, Gitlab, CI/CD
Integrations	REST APIs, Playwright, Gotenberg, Twilio, SendGrid, Sentry
OS	Windows, Mac, Linux

Work Experience

Athena Industrial Services — Kelowna, BC, Canada

Senior Software Developer *Mar. 2024 - Oct. 2026*

- Built ARCD Web, a multi-tenant ASP.NET platform for railroad crossing diagnostics, delivering 87 issues and ~20 releases.
- Designed the health-indicator engine that reduces 24-hour diagnostics, telemetry and rail-break metrics to ok/warn/error per subdivision.
- Delivered ACMS Pass, a .NET MAUI app for Android and iOS, through 13+ releases, including authentication on user-level API keys.
- Built the crossing-test upload pipeline with duplicate protection, and fixed a foreign-key defect corrupting parent/child test records.
- Implemented OTP login and SMS credential delivery for field technicians who have no email address.
- Modernized the platform to .NET 10 LTS, added continuous integration, and replaced a legacy encryption library with .NET AES.
- Built a Playwright-based PDF reporting service generating date-filtered reports from Razor pages.
- Migrated customer databases into an Azure SQL Elastic Pool and consolidated Twilio/SendGrid delivery.

AAA Internet Publishing Inc. (DBA WTFast) — Kelowna, BC, Canada

Senior Software Developer *Sept. 2019 - Jan. 2024*

- Designed and implemented foundational network and project structure in Google Cloud using Terraform.
- Designed a new Windows Client build system on Github Actions, replacing the Jenkins build, and a deployment pipeline for building router software.
- Introduced and deployed a Prometheus metrics monitoring solution.

- Maintained a custom Go OAuth2 server and created a SAML token verification server for an important partner.
- Created Go authentication middleware that allowed the elimination of Cloud Endpoints, and ported a gRPC server to ConnectRPC so web clients could be used.
- Ported the embedded browser from CefSharp to WebView2, and created a websocket server to push client device authorizations.

Atomic 47 Labs — Kelowna, BC, Canada

Software Architect *Aug. 2018 - Oct. 2019*

- Designed high level deployment architecture to optimize cost on Amazon Web Services.
- Designed a Discord chat bot implemented with Node.js and Dokku.
- Mentored junior developers in technical architecture and problem solving.
- Performed Operations tasks such as OS platform, networking, and DNS Management.

Maplecake Software Corp. — Kelowna, BC, Canada

Founder / Senior Software Developer *Dec. 2013 - Aug. 2018*

- Consulting engagements for Sunexo, TheDrillBook, Das Reboot and Do Some Good, across Calgary and Kelowna.
- Implemented a compiler (lexer and parser) for a custom markup language used in content posting.
- Corrected an out-of-memory defect causing slow application startup, and Lucene indexing issues in the ERP ServiceCentre application.
- Implemented TransUnion credit reporting integration into the DealerLink ERP credit application used nationwide in Canada.
- Introduced Jira, Jenkins and HockeyApp across client projects, and mentored junior developers and QA.
- Performed TFS 2012 to 2015 and ActiveReports 10 upgrades.

Big Bear Software Inc. — Penticton, BC, Canada

Software Developer *Jul. 2013 - Oct. 2013*

- Bug fixes on a web application for a Sprockets manufacturer; oil and gas pilot project.

Kelowna FlightCraft — Kelowna, BC, Canada

Programmer/Analyst *Jan. 2013 - Jul. 2013*

- Maintained Lawson M3 workflow plugins and QlikView business intelligence documents.

Earlier Experience

Web Developer, Sonic Solutions, Rovi Corp., Corel Corp. — Santa Clara, CA, USA *Jan. 2010 - Jan. 2013*

- Implemented Jenkins-based deployment for WebCore projects and migrated the Pinnacle Systems marketing site to .NET 4.0.

Software Developer, Bookette Software Company Inc. — Monterey, CA, USA *Jan. 2008 - Dec. 2009*

- Designed REST-based web services for a single-page English tutoring application, plus a continuous integration server to build it.

Software Developer, Graniterock Company — Watsonville, CA, USA *Jun. 2007 - Dec. 2007*

- Build scripts for Visual Studio Team System; deployed a customer receipt tracking system.

Business Analyst, Analyst / Programmer III, AMERISAFE, Inc. — Deridder, LA, USA *Dec. 2001 - Jun. 2007*

- Built a digital dashboard and email alerting system; scaled a custom ERP (ICAMS) to hundreds of users on an embedded Foxpro database.

Education

B.S. in Computer Information Systems and Business Administration, Northwestern State University — Natchitoches, LA, USA *Aug. 1997 - Dec. 2001*
